

# JClass® DesktopViews

## Pre-Built Components for JSE Applications

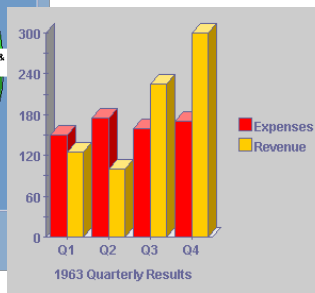

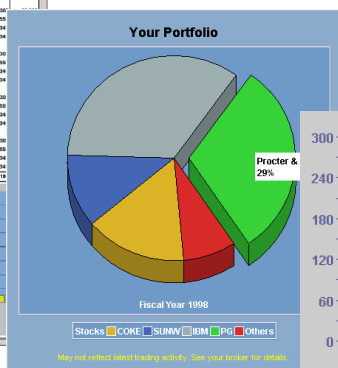

Most Java components built in-house for a specific application are typically used once, as they usually are not designed for reuse. The need for more components often follows with the next project, but building customized components for each new project is both time-consuming and costly for Java developers.

JClass® DesktopViews is the world's leading collection of integrated Java components for professional Java developers. It contains everything you need to build powerful and flexible application interfaces, including 2D and 3D charting, tables and grids, layout and reporting, GUI extensions and enhancements, circular and linear gauges and more.

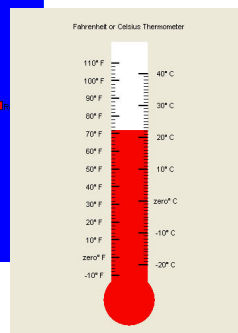

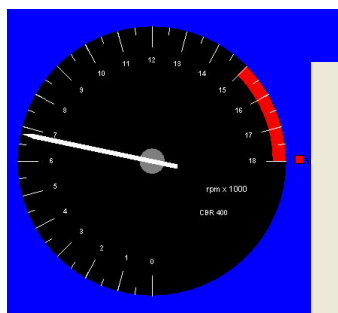

JClass DesktopViews enables you to:

- Build better applications in less time with fewer resources
- Increase the quality of your entire application with fully integrated components
- Take advantage of integration with the latest JDKs and IDEs
- Focus on development related to business logic instead of infrastructure
- Leverage best-of-breed examples, demos, support and documentation to get going quickly

*JClass DesktopViews makes it easy to add rich presentation and user interface functionality to JSE applications.*

## System Requirements:

### Integrated Development Environments (IDE) Supported

- Borland JBuilder
- IBM Rational Application Developer
- Sun Java Studio
- IntelliJ IDEA
- Eclipse
- NetBeans

### Operating Systems Supported

- Microsoft Windows 2000/XP/2003
- Sun Solaris
- HP-UX
- IBM AIX
- Red Hat Linux
- Novel Linux SUSE Enterprise Server
- Apple Mac OS X

### JDKs Supported

- JSE 1.4.2
- JSE 5 (JDK 1.5)
- JSE 6 (JDK 6)

*Note that not all JDK versions are supported on all platforms. Please check the Quest Web site for details on supported platforms.*

## JClass Chart

Embed the power of professional graphs and charts in your GUIs. The leading charting component for JSE applications, JClass Chart offers a dizzying array of chart and graph types including plot, bar, stacking bar, area, stacked area, pie, high/low/open/close, scatter, radar and polar. Each is fully customizable with support for a wide variety of data sources.

### JClass Chart 3D

JClass Chart 3D offers stunning, three-dimensional data presentation. It is fully interactive, so you can rotate, scale and zoom your charts in real time.

### JClass LiveTable

JClass LiveTable is the essential Java grid for creating professional tables and forms. Designed for data-intensive environments, you can easily configure JClass LiveTable to act as a spreadsheet, data-entry form and multi-column list or data grid.

### JClass PageLayout

JClass PageLayout provides you with professional printing and reporting power for client-side Java applications. It outputs directly to the Java AWT Printer, Acrobat PDF, HTML, PostScript Level 2 or PCL 5. You can customize virtually any aspect of your report styles and print output for professional results.

### JClass Gauge

JClass Gauge provides you with highly configurable GUI components that you can use to create 100 percent Java dashboards. The indicator gauges can be used to highlight a fluctuating value in your real-time application. The linear and circular gauges give you the flexibility to present data in terms of a graduated scale. JClass Gauge also lets you add multiple scales, tick marks and tick labels, needles and indicators, headers and footers, labels and legends and ranges and images to your GUI component options.

### JClass Elements

JClass Elements is the essential set of extensions and enhancements for Swing. It includes multi-column outliner, spin boxes, multi-column list box, wizards, layout managers, pop-up calendars and a multiple-document interface (MDI) manager.

### Also Available

JClass® ServerViews is a set of 100 percent Java server-side components that bring professional, dynamic charts and Adobe Acrobat PDF and Microsoft Word-compatible RTF documents from a JEE application server to the browsers of an entire network of users.

### About Quest Software, Inc.

Quest Software, Inc. delivers innovative products that help organizations get more performance and productivity from their applications, databases and Windows infrastructure. Through a deep expertise in IT operations and a continued focus on what works best, Quest helps more than 18,000 customers worldwide meet higher expectations for enterprise IT. Quest Software can be found in offices around the globe and at [www.quest.com](http://www.quest.com).
