

## Easily Gather, Investigate and Deliver Data from Any Source

Querying and reporting on data is an essential part of many jobs—but these aren't always simple tasks. IT and business professionals often work with data stored on multiple sources, or they need multiple tools to gather their data. Data can be difficult to view and understand, and even more difficult to compare and synchronize. As a result of these challenges, data professionals spend long hours to complete projects, which are filled with manual, time-intensive work.

To address these challenges, IT and business professionals need a tool that streamlines their daily data-related tasks in one easy-to-use interface that supports multiple database platforms.

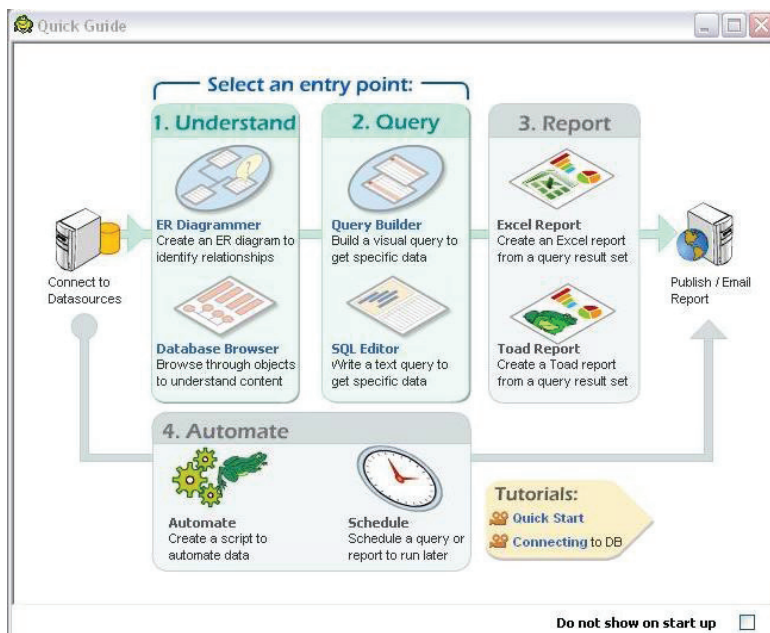

With these needs in mind, Quest Software created Toad® for Data Analysts—a multiplatform tool designed for IT and business professionals who need to gather, investigate and deliver data. With this one tool, you can:

- **Define** your projects and connect directly to data sources
- **Understand** data structures and relationships
- **Query** any database and join data across all platforms
- **Export** data and **publish** reports with ease
- **Automate** and **schedule** frequent tasks

*"I need to write queries against all our different database platforms. Toad for Data Analysts saves me a lot of time because I'm not hopping around to different tools. I just open Toad for Data Analysts in the morning and I don't have to ever leave it."*

— James McGregor,  
BI Administrator,  
Zions Bancorporation

- Gives you direct access to data on any database
- Joins data across all platforms
- Compares and synchronizes data
- Shows data relationships and structures
- Automates and schedules frequent tasks

## Query Data from Any Platform

Designed with you in mind, Toad for Data Analysts enables you to:

- Write heterogeneous queries
- Create queries using the Visual Query Builder
- Write custom SQL statements or reverse engineer SQL

## Connect to Any Database Using One Tool

Toad for Data Analysts allows you to easily **connect to any source where your data resides**, including Oracle, SQL Server, Sybase, MySQL, DB2, Access and Excel databases, and other platforms through ODBC.

## Automate and Schedule Frequent Tasks

Toad for Data Analysts integrates with Windows Scheduler to deploy reports through e-mail, FTP or network paths. It also automates tasks using a graphical timeline.

## Streamline Data Tasks

Toad for Data Analysts makes your daily data-related projects easier than ever by enabling you to:

## Understand Data Structures and Relationships

- Execute SQL against multiple databases simultaneously (Group Execute)
- Compare and sync data
- Format all queries to company standards
- Use SQL history, code completion and templates
- Add look-up information to the data grid

Toad for Data Analysts comes with easy-to-use tools, like an ER Diagrammer and Database Explorer. These allow you to visualize table relationships, view master-detail relationships, and browse, view and edit database tables and objects.

## Export and Publish Data

The **Import/Export Utility Wizard** makes data loading and unloading more efficient than ever. Toad for Data Analysts exports data to Excel with just one click and supports a variety of other file formats, including .CSV, .TXT, HTML and PDF.

Please review the Release Notes and Installation Guide for a complete list of features and requirements.

## About Quest Software, Inc.

Now more than ever, organizations need to work smart and improve efficiency. Quest Software creates and supports smart systems management products—helping our customers solve everyday IT challenges faster and easier. Visit [www.quest.com](http://www.quest.com) for more information.

## SYSTEM REQUIREMENTS

### Operating Systems:

- Windows 2003 (32-bit)
- Windows XP Professional (32-bit or 64-bit)
- Windows Vista (32- or 64-bit)
- Windows Server 2008 (32-bit or 64-bit)

### Platform:

- Pentium 3 or greater, running at a minimum speed of 1GHz

### Memory:

- 512 MB of RAM minimum, 1 GB recommended

### Disk Space:

- 800MB to install, 239 MB to run

### .NET Framework:

Microsoft .NET Framework 3.5 (Service Pack 1)

### Browser:

- Microsoft Internet Explorer 6.0 or later

### PDF Viewer:

- Adobe Acrobat Reader 5.0 or later

### Supported Databases:

- Oracle® 9i, 10g, 11g R2
- Microsoft® SQL Server 2000, 2005 and 2008
- Sybase ASE 12.5, 15.0.2, 15.0.3
- MySQL 5.1
- IBM DB2® z/OS 8.1 or later  
IBM DB2® LUW 8.1.5 or later, 9.1 or later
- Microsoft Access 2003 and 2007
- Microsoft Excel 2003 and 2007
- Any database with a ODBC v3.0 (or later) driver

### Cloud Database Services:

- Oracle databases running on Amazon EC2
