

- Quickly create, modify, execute and save queries
- Format the layout of code, including inserting headers, adding or removing extra lines and changing the case for keywords
- Simply save extracted data from the database to different formats
- Quickly view, create, modify and manage database objects
- Easily obtain instant access to MySQL expertise, answering 70 percent to 80 percent of development and administration questions

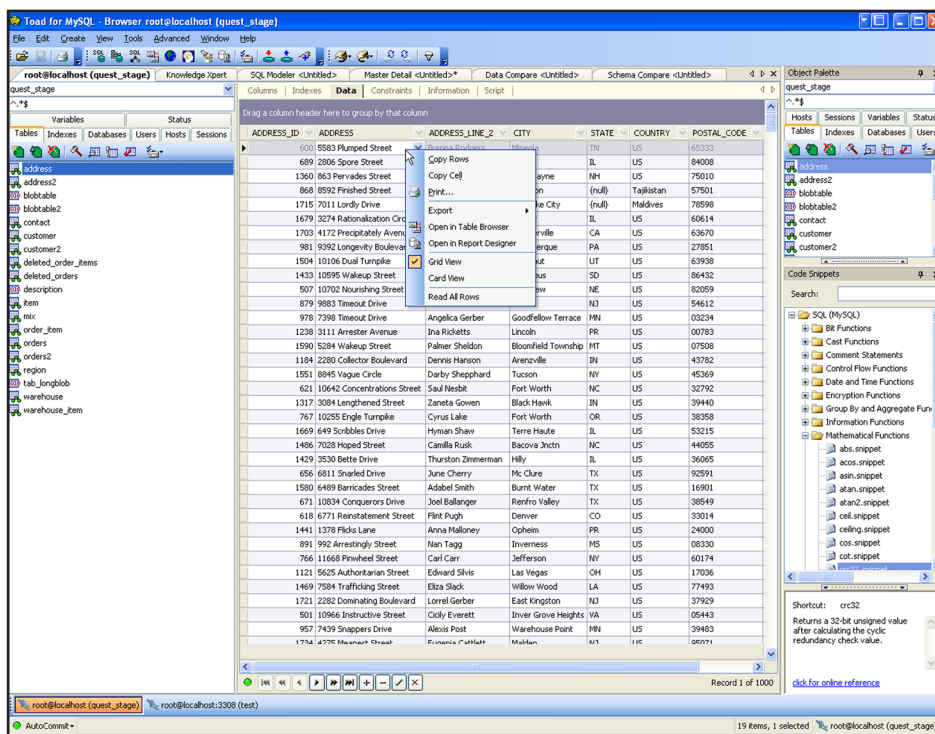

## Faster MySQL Database Development and Administration

With growing demands from customers and end users, database professionals are being asked to meet deadlines with increased swiftness. Whether a simple Web site or an enterprise-class application, developers and administrators of different skill levels must quickly create queries, manage database objects and develop and review application code. In addition, they must uncover and solve issues quickly and efficiently.

Toad™ for MySQL is a database development and administration solution that enables you to rapidly create and execute queries, automate database object management and develop SQL code, while providing instant access to MySQL expertise.

With Toad for MySQL, you have access to a community of users, peers and experts to help solve development and administration issues, and assist in developing applications. You can also provide feedback to Quest on product improvements.

All of this comes with the backing of Quest Software, a healthy and growing corporate entity that can provide the necessary training, support and superior customer service demanded by IT management.

## System Requirements

### Minimum Hardware Requirements:

- IBM style PC
- 44 MB of disk space for installation
- 256 MB of RAM minimum, 512 MB recommended
- VGA monitor with a resolution of at least 800 x 600 is required, and a resolution of 1024 x 768 is recommended
- Mouse pointing device

### Minimum Software Requirements:

- Microsoft Windows 2000 and XP Professional client
- Microsoft .NET Framework version 2.0
- Internet Explorer 5.01 or later
- MDAC 2.6 or later
- Client connectivity and configuration for each database (prerequisite for connecting)

### Supported Databases:

- MySQL® Network™ version: 4.1.18, 5.0.19
- MySQL® Pro™ versions: 4.1.18, 5.0.19
- MySQL® Classic™ versions: 4.1.18, 5.0.19

## A Powerful SQL Editor

Toad for MySQL makes the task of editing SQL effortless. Features include:

- Macro Record/Playback for recording a series of keyboard commands in the editor that can be played back multiple times, reducing manual effort
- Find and Replace, which performs a Find and Replace across multiple files found in a directory structure, saving time
- Configurable code formatting to modify the layout of SQL code in the editor
- Code Snippets that provide drag-and-drop functionality for frequently used SQL functions
- Shortcut keys for performing frequently used actions
- Auto completion to automatically complete databases, tables and columns when entered

## Data Grids

Toad for MySQL displays the output of data in ways that are easy to understand, configure and output to different file formats. The data output can be viewed in either a grid or card view format for summary information at a glance. Output can be configured by sorting, grouping, filtering and moving columns without re-executing the query. Either entire data queried or selected data in a grid can be outputted to multiple formats, including: Excel, Fixed Column Width, Delimited Text, XML Schema, XML Data, HTML Table or Insert Statements.

## Database Browser

The Database Browser lets you view database objects across multiple databases or servers. Objects such as tables, indexes, views, users, hosts, sessions, procedures and functions can be quickly viewed and managed through drill-down options. The Database Browser simplifies sifting through hierarchical mountains to find the correct data. With a single click, it further facilitates the comparison of objects of the same type.

## Knowledge Xpert

Toad for MySQL includes built-in Knowledge Xpert™, which provides answers to 70 percent to 80 percent of developers' and administrator's daily questions. Knowledge Xpert includes topics for database administration, database development, installation and configuration, monitoring and tuning, as well as a reference for all MySQL syntax, operators and functions. Knowledge Xpert also includes collaborative capabilities for sharing knowledge among teams.

## About Quest Software, Inc.

Quest Software, Inc. delivers innovative products that help organizations get more performance and productivity from their applications, databases and Windows infrastructure. Through a deep expertise in IT operations and a continued focus on what works best, Quest helps more than 18,000 customers worldwide meet higher expectations for enterprise IT. Quest Software can be found in offices around the globe and at **www.quest.com**.
